SKILLS

HTML/CSS, React, JavaScript,
Polymer 3, Tailwind CSS,
NextJS

NodeJS, NestJS, Docker, Java,
MongoDB, PostgreSQL, Redis,
C++, Laravel

Active listening, teamwork,
problem solving, willingness to
learn, organization

HOBBIES

- Fitness Enthusiast
- Guitar Player
- Cycling Addict
- Content Creator
- Dog Lover
- Volunteer at animal shelter
- Tennis

PROFILE

From the Azores I came to Oporto to follow my passion and applied to the MSc in Informatics and Computing Engineering at FEUP. I have developed a few projects in the academic environment and am currently involved in some own projects but always looking to achieve more.

EDUCATION

EB/S Cardeal Costa Nunes, Higher Level Scientific-Humanistic Course,
Science and Technology

Mar 2011 – Jul 2014

Common core of Math, Physics, Chemistry, Biology, Geology and
Philosophy.

Faculdade de Engenharia da Universidade do Porto, MSc in
Informatics and Computing Engineering

Set 2015 – Jul 2020

MSs in Software Engineering with a dissertation theme related to
Robotics, Data Collection and Graphical Computation.

PROJECTS

Distributed Blackjack

Feb 2018 – May 2018

For the class of Distributed Systems, a server-based blackjack casino Java application was developed where users could play together at the table over the network.

PC Auctions

Feb 2018 – May 2018

For the Database and Web Applications Laboratory, my team and I developed an information system with a web interface for an online auctions platform. We used HTML5, CSS and JavaScript for the front-end and the Laravel framework and PostgreSQL database for the back-end.

Adota.net (Volunteering)

Under Development

As a personal volunteering project, me and some colleagues are currently developing a website to aid pet shelters. for them to be able to better reach people, receive help and get adoptions. It is being built with React and being managed on the backend with NodeJS and a self-hosted CMS.

PROFESSIONAL EXPERIENCE

Software Engineer | Bolttech Group

Nov 2019 – On going

Employed as a Full-stack Software Engineer working on an international project. As a squad lead of a small team, I manage inter and intra-squad relationships. I work on both frontend and backend projects built using JavaScript frameworks, following a micro-services architecture.
